Resistant and washable transport sheet ready to use

- 8 handles
- Made of impermeable red PVC
- Washable and disinfected
- Dynamic resistance at 680 Kg/cm²
- Dimensions: about 200x70 cm
- Capacity: about 150 kg

IMM120321	TRANSFER SHEET
IMM120340	TRANSFER SHEET WITH SAFETY BELTS AND PILLOW
MIL10624	TRANSFER SHEET CAMOUFLAGE

IMMOBILIZATION

- Back rest and lying part made with thermoplastic material reinforced to allow cardiac massage. Easy to clean and to disinfect
- Adjustable back rest 0-90° moved by a gas piston which allow to fix the back rest safely in any position
- Side protections can be overturned
- Blocking device for folded legs with a system that avoid the compression of the blocking bar
- Safety lever for the legs positioned near the unlocking device allowing thus the release operation for the loading, keeping the hands on the stretcher
- Vertical legs protected by nylon wedges
- Automatic centering device mounted on rotating wheels. This system automatically block the back wheels in the central position during the loading of the stretcher on the ambulance without having to turn the wheels manually
- Complete with mattress and belts
- Length: about 193 cm
- Loading height: max about 81 cm, min. 63 cm, height when folded: 22 cm
- Weight: 36 kg
- Load capacity: 170 kg

910	AUTOMATIC LOADING STRETCHER WINNER
950/3	REAR FIXING SYSTEM
965	FRONT FIXING SYSTEM

An essential implement to easily carry patients in places like stairs, corridors and lifts where stretchers usually cannot be used. It is supplied with four levers, the two lateral being adjustable both in height and length in order to improve transport in every situation. An automatic blocking device allows to open and close the chair in maximum security. Reduced dimensions when folded.

- Aluminium frame light and easy to handle
- N. 3 quick unhooking belts for the immobilization of the patient
- N. 2 fixed wheels to make the transport easier on smooth floors
- Height: 90cm; width 53 cm; length min. 71 cm; length max 130 cm; width when folded 24 cm
- Weight 10 kg; load capacity 170 Kg, height when folded 90 cm.

650	SEDAN CHAIR "MAYA"
-----	--------------------

- 4 wheels (2 fixed frontal with 125 mm diameter and 2 spinning with brake with a 100 mm diameter)
- N. 3 quick unhooking belts for the immobilization of the patient
- N. 2 small fixed and 2 spinning wheels
- Height: 90cm; width 52 cm; length min. 70 cm; length max 126 cm; width when folded 22 cm
- Weight 12 kg; load capacity 170 Kg, height when folded 90 cm.

654/B	FOLDABLE SEDAN CHAIR "QUICK"
-------	------------------------------

Entirely made in special Ergal legue, it is nowadays the lightest in the market. The backrest and back carrying handles inclination, along with the unique frontal arms configuration, enable a perfect weights distribution, relieving operator's strengths. Long and high-grip tracks allow the EXTRA stair-chair to be safely led and handled on 3 stairs when descending with a seated patient. While leading on smooth and plane surfaces, the 200 mm. rear wheels give exceptional comfort. Telescopic rear bar, turnable foot rest with magnetic locks, innovative bio-mechanical solutions, complete the characteristics of this rescue device

- N°2 small fixed and 2 spinning wheels
- Height: 101 cm; width 55 cm; length min. 81 cm; length max 142 cm; width when folded 29 cm
- Weight 15,5 kg; load capacity 200 Kg, height when folded 101 cm

670	STAIR CHAIR "EXTRA"
-----	---------------------

- Anatomic pillow for stretcher
- Made of antibacterial, flame retardant and washable material
- Dimensions: about 40x27x7 cm.

IMM122050 ANATOMIC PILLOW FOR STRETCHER

- Rescue can, rescue buoy
- Light and imperishable
- Printed in high density polyethylene without joints
- Endowed with floating 186 cm rope and shoulder strap

IMM126000 RESCUE CAN

- Board for external cardiac massage
- Lightweight, durable and easy to handle.
- X-ray transparent
- Dimensions: 60x41x7,5 cm.
